---

There is no reason that our trucks would have gone off the road especially that far. You can go talk with them. If we have some topsoil we could fill it in for them and rake it out but I don't want to spend too much time on it.

I found this early this morning, its on our truck path to the site on E. Cottonwood. I thought it could have been from one of our trucks, but we checked the tire width and it is too narrow for our trucks to make, plus the ruts do not make sense with how a truck would back up in that area. We believe it is the mail carrier. Take a look and call me. I plan to go talk with the resident about it, and I want to see if you want us to go ahead and fix it or defer to the city?
